

## Instructions

- The reason why your group chose the topic
- The individual contributions of each group member
- Screenshots / photos while doing the project

**Group: Mariann Altamero, Aneeqa Marco, Bianca Rodrigues**

**Section: Lithium**

## Topic: Unemployment

**Why did our group decide to choose this topic?**

- The discussed topic is Unemployment, as it represents a serious social and economic concern, not just to the individuals but also to the families and communities. Unemployment is not only a matter of no job—it also has a chain of consequences such as financial problems, emotional distress, and decreased living standards for a lot of people. Through our inquiry into this subject, we want to gain a clearer view of the factors that lead to unemployment, its effects on the whole society and what probable solutions might be used to lessen the issue. Talking about unemployment is necessary since it is an issue that touches the whole economy and in turn might affect the future generations' opportunities, including our own.

## Individual Contributions
